ANATOMICUSH™

Our new ANATOMICUSH midsole technology is engineered to deliver incredible comfort, with soft curves shaped to hug the contours of your feet, seamless smart-spots under your toes, under your heels and a motion-empowering grid of flex-lines.

- Single-density ergonomically shaped midsole
- Superlight, with flex-lines for freer foot movement
- This is a wider fit than SUPERCOM™

iQUSHION™

Our superlight iQUSHION™ midsole is smart-engineered with ergonomic arch contouring and micro-bubble foam impact pillows for all-day heel and ball-of-foot cushioning.

Ultra-lightweight, single-density ergonomics

- Features impact pillows to cushion high-pressure areas
- Anatomically mimetic midsole—curved to cup your feet

SUPERCOMFF™

Our slimline SupercomFF midsoles are deceptively cush, pressure-diffusing, made from double-density material and have been ergonomically engineered and shaped to fit under your feet so your shoes really ‘move’ you.

- Designed for advanced comfort
- Pressure-diffusing dual-density EVA
- Lightweight and flexible
- This is a narrower fit than ANATOMICUSH

MICROWOBBLEBOARD™

Triple-density construction, ergonomically designed for cushioning and underfoot comfort.

Engineered by two pioneering British biomechanists the MWB midsole increases the contact area of the foot to the midsole diffusing underfoot pressure and as a result delivering extraordinary comfort.
